

Hello,

September promises to be full of new products, with fire resistant products at the top of the agenda. Safety standards in public spaces are prompting us every day to adapt our products to this market requirement. The integrated fire-resistant treatment ensures long-lasting protection while preserving the esthetic appeal of our products. To be noted: we make it easy for you to obtain our certificates, which are available on request.

Also on the program: new bohemian-style flowers, and aspleniums ideal for green walls.

We wish you all a successful returning,

Vert Espace
